Deployment Portfolio Task 1 (10 Points)

- **Due:** Tuesday by 2:59 AM
- **Points:** 10
- **Submitting:** A file upload (PDF or MS Word document)
- **Available:** 19 Sep at 3:00 – 29 Sep at 2:59

Deployment Activity 1

You should perform tasks that will, in total, provide a potential of **10 marks**.

Simple deployment tasks (following walkthroughs, online demos, "hello world"-like deployments).

> **Note:** Some resources are available under **"Modules/Unit Resources"**, including software, walkthroughs, etc.

Submit your Task 1 WiX report only here (don't submit other task reports here).

Task 1: Desktop deployment using the Windows Installer XML (WiX) tool – Individual Task

(10 marks individual Task)

(Not to be confused with the Wix website creation tool.)

Grading Breakdown by Sub-Task:

- **Task 1.1: Pass** *(if completed fully with the highest quality)*
- Follow the WiX walkthrough and deploy a sample desktop.
- **Task 1.2: Credit** *(if completed fully with the highest quality)*
- Follow the WiX walkthrough and deploy your own C, C++, or C# desktop.
- **Task 1.3: Distinction** *(if completed fully with the highest quality)*
- Complete tasks 1.1 or 1.2 **AND** deploy an application with multiple DLLs or dependencies.
- **Task 1.4: High Distinction** *(if completed fully with the highest quality)*
- Complete task 1.3 **AND** deploy your application to the Microsoft Store for public access and download **OR** explain in detail how to deploy to the Microsoft Store.

Notes

- **WiX Toolset installation:** See under *"Modules/Unit Resources/Software"*.
- **Visual Studio installation:** See under *"Modules/Unit Resources/Software"*.
- **DLLs:**
- For the entry-level programmer, DLLs are a programming concept. In Microsoft Windows, these have a `.dll` extension (Dynamic-Link Library). You can create a program containing methods/functions without a `main` method, then compile it to a `.dll`. It cannot run standalone, but you can link it to other programs (ones with a `main()`) allowing them to call functions/methods from the DLL.
- Most large programs work this way (in Linux, the equivalent

extension is `.so`). This allows updating parts of an application (replacing a faulty DLL to patch) without performing a full reinstall.
- Reference guide: Creating C# Class Library DLL Using Visual Studio .NET

General Instructions & Policy

- Each task has a marking rubric that includes the minimum requirements needed to achieve the equivalent of Pass, Credit, Distinction, or HD grades.
- **In general, the mark achieved for a task will be determined by the sub-tasks attempted and the quality of these tasks (see the subtasks and the marking rubric).**
- To attempt a high grade for a task, students must complete all lower-level sub-tasks leading up to that level.
- Students may choose to attempt high grades for some small tasks but just a pass grade for larger tasks.
- The final result for the portfolio will be the sum of the grades for each task.
- Submit a report including what you did and screenshots providing evidence of this. The report must include a publicly accessible IP address/URL for verification. Submit the report through the Canvas Assignment portal.
- Please submit before the due date. Any late submissions (up to 5 days) will incur penalties as stipulated in the unit outline.
- **Target level rule:** If you are aiming for a specific level (P/C/D/HD), you must work on that level. You cannot change to submit another level after the due date. Feedback will be given on the level aimed for at the initial submission by the due date.
- The submitted report will receive feedback and grades only once. There are no re-submissions or re-assessments.

Submission Instructions

Deployment Report Structure

For each deployment task, prepare a **PDF or MS Word document** containing the following sections:

1. **Student details:** Student ID, Full name
2. **Unit details:** Unit code and Name (`SWE40006 Software Deployment and Evolution`), Semester
3. **Dates:** Due date and submission date
4. **Declaration of task level attempted:** (Sub-tasks 1.1 to 1.4)
5. **Evidence of completion:**

- Provide evidence of completion for the sub-tasks attempted.
- Evidence can include screenshots (labeled with captions), pasted text from console windows, descriptions of steps taken, and documentation of any errors encountered and how they were resolved.
- **Source Code** / **Scripts:** Where source code and/or script files are required for discussion/verification, include them via a **publicly accessible IP address** / **URL**; **DO NOT** paste raw source files directly into the report.
- **Binaries:** Executables must not be submitted, but evidence of their successful compiling, building, and deployment should be included as screenshots or console output.

Marking Rubric: Deployment 1 Rubric (Total: 10 Points)

Criteria	High Distinction	Distinction	Credit	Pass	No Marks	Points
Analysing and investigating	**4 Pts**					

Analysed and investigated errors on console and described clearly on eradicating all errors. | **3 Pts**

Analysed and investigated errors on console and has a short brief on eradicating errors. | **2 Pts**

Analysed and investigated errors on console but does not have enough explanations. | **1 Pt**

Analysed few errors but did not investigate errors on the console. | **0 Pts**

No evidence provided for criterion. | / 4 pts | | **Source Coding and brief explanation** | **4 Pts**

An ability to provide deployment outcomes successfully with a brief explanation of coding/scripts, and presented clear images/pasted console. | **3 Pts**

An ability to provide deployment outcomes successfully with coding/ scripts, and presented images/pasted console. | **2 Pts**

An ability to provide deployment outcomes successfully with 1–2 errors in coding/scripts, and presented with images/pasted console. | **1 Pt**

An ability to provide deployment outcomes with few errors in coding/ scripts. | **0 Pts**

No evidence provided for criterion. | / 4 pts | | **Quality, Report writing skills, Spelling and grammar** | **1 Pt**

Written report with no spelling, grammar errors throughout the text and

has better quality content. | **0.75 Pts**

Written report with no spelling, grammar errors throughout the text with good quality content. | **0.5 Pts**

Written report with minor spelling and grammar errors throughout the text. | **0.25 Pts**

Written report with major spelling and grammar errors throughout the text. | **0 Pts**

No evidence provided for criterion. | / 1 pt | | **Quality in Report structure (appropriate Headings/sub-headings)** | **1 Pt**

Ability to provide report structure in an appropriate form and proper explanations. | **0.75 Pts**

Ability to provide report structure in an appropriate form with few explanations. | **0.5 Pts**

Ability to provide report structure in an appropriate form. | **0.25 Pts**

Does not have an ability to provide report structure in an appropriate form. | **0 Pts**

No evidence provided for criterion. | / 1 pt
